### **DETAILED ACTION**

Claims 1-36 are pending.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18, 19, and 23-28, drawn to a method of removing insulin induced suppression of aponectin receptor (AR) expression by treating cells with a Foxo1 gene.

Group II, claim(s) 18, 20, and 23-28, drawn to a method of removing insulin induced suppression of AR expression by treating cells with a Foxo1 protein.

Group III, claim(s) 18 and 21-28, drawn to a method of removing insulin induced suppression of AR expression by treating cells with an PI3 kinase inhibitor.

Group IV, claim(s) 29-33, drawn to a screening method for a compound that inhibits insulin induced suppression of AR expression.

Group V, claim(s) 34, drawn to a screening method for a compound that reduces PI3 kinase activity.

Group VI, claim(s) 35, drawn to a screening method for a compound that reduces Foxo1 phosphorylation in the presence of Akt.

Group VII, claim(s) 36, drawn to a method of suppressing AR expression by contacting cells with an insulin gene.

Group VIII, claim(s) 36, drawn to a method of suppressing AR expression by contacting cells with an insulin gene.

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1632

A) The invention has no special technical feature that defined the contribution over the prior art, or

B) Unity of invention between different categories of inventions will only be found to exist if specific combinations of inventions are present. Those combinations include:

- 1) A product and a special process of manufacture of said product.
- 2) A product and a process of use of said product.
- 3) A product, a special process of manufacture of said product, and a process of use of said product.
- 4) A process and an apparatus specially designed to carry out said process.
- 5) A product, a special process of manufacture of said product, and an apparatus specially designed to carry out said process.

The allowed combinations do not include multiple products, multiple methods of using said products, and methods of making multiple products as claimed in the instant application, see MPEP § 1850 or 37 CFR 1.475.

Applicant's claims encompass multiple inventions and do not have a special technical feature which link the inventions one to the other, and lack unity of invention. The instant claims encompass multiple different method claims. Multiple inventions encompassing multiple different cell treatment methods and multiple different screening methods are not one of the allowed combination of inventions that would be deemed as having unity of invention, as described in situation B. Therefore the instant claims lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1632

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
